

GETTING STARTED

1 PREPARE THE SKIN

Be sure the skin is free from oils, lotions, and moisture before applying. Cleaning the skin with alcohol will ensure a strong adhesive bond.

2 "I" AND "Y" STRIPS

3 STRIPS CAN BE APPLIED IN TWO WAYS:

Anchored at the end. Remove 2" of paper from end of tape and apply.

OR Anchored from middle. Tear paper in middle and peel back paper to expose middle section of tape.

4 TAPE ENDS

Always attach the last 2" without stretching tape.

5 SETTING ADHESIVE

To ensure proper setting of the adhesive, rub hand over tape to secure the edges.

6 TO STRETCH OR NOT?

Stretch tape as directed for each application.

APPLYING THE TAPE

NO STRETCH

Anchor "Y" strip as shown.

NO STRETCH

Extend arm backward with thumb pointing up. Without stretching the tape, apply across front of shoulder as shown.

NO STRETCH

Fold arm across the chest. Without stretching the tape, apply second leg of tape as shown.

NO STRETCH

FULL STRETCH

Anchor second "Y" strip as shown.

NO STRETCH

With shoulder blades pulled together, fully stretch both ends of tape and apply across top of scapula.

HELPFUL TIPS

1. Be sure that the tape is at room temperature or warmer before applying.
2. Make every effort to apply tape directly to skin and not on top of other tape. KT Tape does not adhere well to itself and may loosen prematurely if the ends are not attached to skin.
3. KT Tape is water resistant and can remain attached during water activities and bathing. The tape should be applied one hour before entering the water or engaging in heavy physical activity to make sure that the adhesive is set.
4. Do not use KT Tape as a first aid bandage or on open wounds.
5. KT Tape can be worn for up to five days per application. Discontinue use immediately if KT Tape results in increased soreness or skin irritation.

These instructions provide general techniques in applying KT Tape for common conditions and are for educational purposes only. They are not meant to replace professional medical advice or treatment. Muscle and joint pain can and often does indicate serious conditions requiring professional medical evaluation and treatment. Seek professional care for persistent pain and dysfunction.
